

Made in USA

## *UV Clear*

## *Technical Specifications*

UV protection window films reduce fading and sun damage to your furnishings, possessions and stock.

The UV control film is completely clear and can be used on most glass surfaces, including double glazed units and even picture glass. It is easy to cut and apply.

Visible Light Transmission	88%
Visible Light Reflectance	Low
Ultraviolet Light Transmission	<1%
Shading Coefficient	1.0
Solar Energy Absorption	7%
Total Solar Energy Rejected	13%

\* Solar Specifications testing performed on film mounted to 3mm clear glass. Test, equipment and methods according to ASTM, ANSI and NFRC standards. Calculations performed using Lawrence Berkeley Lab's "Windows 5.2" program. Values expressed hereof are typical and for comparative purpose only. Performance data will vary with processing conditions.
